

camera capabilities, with a quad-curved glass body, sleek colour options, and an IP68/69 rating for durability. The phone feels premium, though its size might not suit users with smaller hands. Powered by the MediaTek Dimensity 9400 chipset, it handles multitasking and gaming

effortlessly. The 6.78-inch AMOLED display delivers vibrant visuals, with a peak brightness of 4,500 nits ensuring excellent outdoor visibility.

Despite its strengths, the Find X8 Pro is not without flaws. Low-light photography could improve, and ColorOS, whilst feature-

rich, comes with unnecessary bloatware. Still, its innovative camera system, powerful performance, and elegant design make it a compelling choice for users seeking a photography-first flagship experience.

## REVIEW

# CLICKING IN THE DAYLIGHT

Vivo enters the flagship market with the X200 Pro, building on the success of the X100 Pro, with significant upgrades in camera technology, design, and performance. Aimed at photography enthusiasts, it competes against devices like the Samsung Galaxy S24 Ultra and iPhone 16 Pro Max.

The standout feature is the oversized camera, with a 200MP periscope telephoto lens. It provides exceptional portrait and zoom photography, with accurate edge detection and natural colours. Low-light results are slightly less detailed compared to the X100 Pro due to a smaller main sensor. For content creators, it supports 8K video recording and advanced tools like 4K at 120 FPS.

The AMOLED display peaks at 1,990 nits, offering sharp and vibrant visuals even under direct sunlight. The MediaTek Dimensity 9400 chipset ensures smooth multitasking and app performance, supported by 16GB RAM and UFS 4.0 storage. However, gaming performance is not exceptional.

The 6,000mAh battery delivers nearly 10 hours of screen-on time, while the 90W wired charger charges the device fully in 45 minutes. FunTouch OS improvements include smoother animation and a cleaner UI, but comes with bloatware.

The Vivo X200 Pro excels as a photography-first flagship with superb battery life, but it is bulky and has middling gaming performance.
