

rebuilt along with the establishment of a medical college. Although the promise was partially fulfilled in 2004 with the reopening of a 300-bed hospital, the dream of establishing a medical college remained unfulfilled.

Establishment of GAIMS: Public-Private Partnership Initiative

In 2008, the government renewed its efforts to establish a medical college by seeking a strong private partner to manage the G K General Hospital on a Public-Private Partnership (PPP) basis. Despite numerous challenges, the Adani Group stepped forward, demonstrating its commitment to corporate social responsibility. This partnership led to the creation of the Gujarat Adani Institute of Medical Sciences (GAIMS) in 2009, making it the first successful PPP in healthcare in India.

Growth and Expansion

Since its establishment, GAIMS has grown significantly. In 2014, the 300-bed District Hospital was handed over to the Adani Group under PPP, with the objective of upgrading the hospital infrastructure to 800 beds and building a high-tech healthcare facility. This initiative aimed to provide quality and free medical services to the people of Kutch and surrounding areas.

Healthcare Services and Facilities

Today, GAIMS is a beacon of advanced medical care and education. The institute offers free medical care to Below Poverty

Line (BPL) patients, army personnel, accident cases, senior citizens, and others on a partial cost-recovery basis. GAIMS boasts an impressive array of facilities, including an 800-bed capacity, 14 Modular Operation Theatres, and various Modular Intensive Care Units (ICU, PICU, NICU, RICU, MICU, SICU, OICU), comprising around 150 ICU beds.

State-of-the-Art Technology

The institute is equipped with modern radiology equipment, including a 1.5 Tesla MRI Machine and a 128-slice CT Scan Machine. Additionally, GAIMS has a high-end laboratory with the latest diagnostic machines, a 20-bed Dialysis Centre, a Thalassemia Centre, and other essential infrastructure required for a frontline modern multi-specialty teaching hospital. The institute continually adds new departments and services to enhance its healthcare offerings.

The Dialysis Centre was initiated in 2015, and over the past decade, the annual number of patients is approaching 9,000. The number of dialysis cases has almost doubled in the last five years. Annually, over 4,000 deliveries are handled successfully, with a consistent increase in patient numbers, reflecting a 51% rise in deliveries over the past five years. Close to 12,000 CT scans are performed annually.

MRI scans are also increasing, with nearly 5,000 scans conducted annually. Nearly 35,000 sonographies are performed

annually, which equates to 100 USGs per day.

Due to the superior medical treatment offered by well-trained and experienced doctors and paramedic staff at GAIMS, the mortality rate has halved from 5.6% in 2014 to 2.8% in 2023. Today, the stage is set for GAIMS to take another leap in further modernising healthcare, establishing new tertiary care facilities, and emerging among the top medical teaching institutions in India.

Educational Contributions

GAIMS is committed to nurturing the next generation of healthcare professionals. Each year, the institute graduates 150 MBBS doctors and more than 100 Post Graduate doctors in all clinical and para clinical specialties, who go on to serve the nation. Both undergraduate and postgraduate students from GAIMS have garnered numerous awards in various academic competitions as well as cultural and sports programmes, both nationally and internationally.

The journey of GAIMS from the ruins of the G K General Hospital to a state-of-the-art medical institute is a remarkable story of resilience, commitment, and the power of public-private partnerships. Through its unwavering dedication to providing quality healthcare and education, GAIMS has become a cornerstone of the medical community in Gujarat, serving as a model for similar initiatives across the country.
