

START-UPS ASTROTECH

generated by repeat customers.

Per market leaders, including Astrotalk, Astroyogi and AstroSage, the primary user base for these services comprises millennials, or people born between the early 1980s and late 1990s, and Gen Z, or the internet-savvy cohort born between the mid-1990s and the mid-2010s.

The shift in this traditional space

is driven by increasing digital adoption and a rising demand for personalised, easily accessible services.

THRIVING IN TECH

The astrology sector is undergoing a technological renaissance, with AI and machine learning (ML) transforming the way astrologers

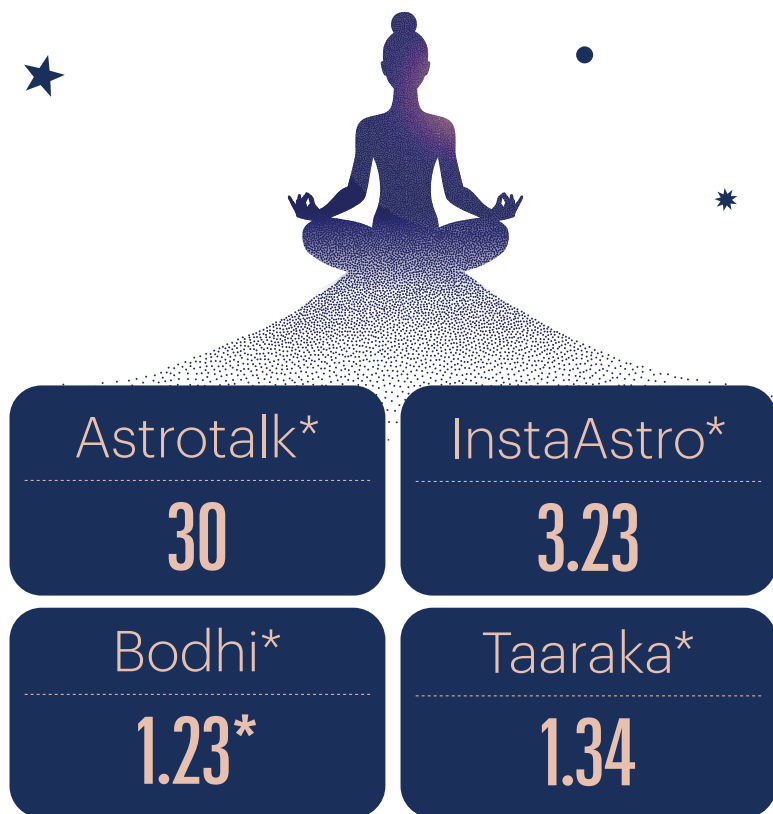

provide personalised services. From generating future astrological and numerological reports to delivering tailored analyses, technology is enhancing efficiency and accuracy, making astrology more appealing to tech-savvy audiences. It is attracting VC investors' interest as well.

"The astrology sector has been one of the few pandemic-driven growth areas that not only sustained but thrived in subsequent years. With AI and ML integration, astrology platforms have evolved into habit-forming apps, especially for younger users," says Anirudh A. Damani, Managing Partner at Artha Venture Fund. In May 2024, his fund backed InstaAstro, an online astrology and wellness platform, with a \$2.3 million (approximately ₹18 crore) pre-Series A investment.

Damani believes the integration of Large Language Models (LLMs) could revolutionise the astrotech sector, enabling astrologers to offer deeper, more tailored insights. He emphasises that astrology, increasingly popular globally, is a recession-proof industry.

Astrologer Punit Pandey, founder and Chief Innovation Officer at AstroSage AI, says that technology is the perfect tool for the transformation of astrology. It breaks barriers, reaching places and people that traditional methods cannot. And among all technologies, AI is the Holy Grail—it brings knowledge, speed, and precision to the masses. "With AI, we're not just replicating astrology; we're redefining it," he says. When asked about the possibility
