

Himadri's Evolution: From a Modest Start to Global Excellence

In Conversation with –
Anurag Choudhary, CMD & CEO, Himadri Speciality Chemical Ltd

Q Himadri Speciality Chemical Ltd has grown from a modest coal tar distillation operation into a global leader in speciality chemicals and advanced materials, catering to multiple industries. What have been the key factors driving this remarkable transformation over the years?

Himadri Speciality Chemical Ltd has been at the forefront of

innovation, research & development, and sustainability for more than three decades. Starting its illustrious journey as a small coal tar distillation unit in 1990, today, the company has developed into a leader in speciality chemicals and advanced materials globally, strategically diversifying across the carbon value chain driven by in-house R&D capabilities, focusing on delivering premium

quality to its stakeholders across all of its product categories. Himadri's unflinching desire and dedication toward technological advancements, following sustainable practices, has transformed the company into a global powerhouse operating in both domestic and international markets, exporting to over 54 countries across the globe, serving multiple industry sectors, including EV (lithium-
