India's artificial intelligence (AI) ecosystem is witnessing significant growth, driven by substantial investments, a thriving start-up ecosystem, and government initiatives. The country has allocated ₹10,372 crore for the IndiaAI Mission to attract top talent, provide risk capital, and ensure socially impactful AI projects. Here's an overview of the AI landscape in India:

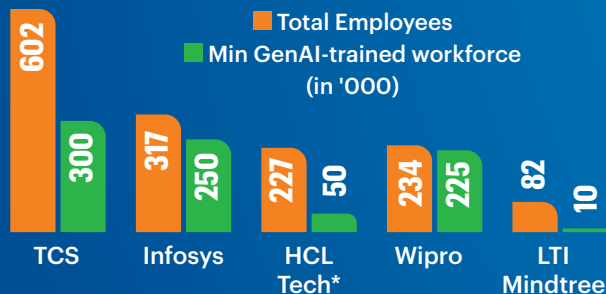

SET FOR A GROWTH SURGE

The Indian AI market is projected to grow at a CAGR of 25-35% till 2027, supported by a large AI talent base and high investments

PREPARING FOR THE FUTURE

Indian IT majors are investing aggressively to train their employees in AI applications

Top 5 companies on the basis of market capitalisation

*HCL Technologies did not give exact AI talent in the annual report. It projected to train more than 50,000 employees in FY25.

COUNTRY-WISE DISTRIBUTION

The US is in the lead as 38% of GenAI start-ups that were launched in 2024 were domiciled there
