

PRIVATE FUNDING DIP

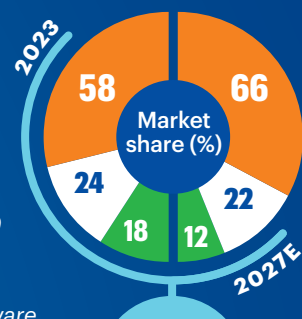

Indian AI start-ups have raised more than \$16 billion so far. After peaking in 2022, funding has declined sharply in the past two years

GLOBAL ECOSYSTEM

The global AI market is expected to grow to \$320-380 billion by 2027 witnessing a CAGR of 25-35% from \$110-130 billion in 2023.

■ Software ■ Services ■ Hardware

1,979

Number of AI start-ups in Bengaluru as of February 13, 2025, followed by Mumbai (700), Delhi (696) and Hyderabad (523), as per Tracxn

₹20,000

CRORE

Deep tech-focused Fund of Funds announced in Budget 2025-26 to accelerate advancements in AI, quantum computing, and semiconductor research

1.3

PERCENTAGE POINTS

Expected increase (\$957 billion) in India's annual GVA growth rate by 2035 because of AI adoption, if intelligent machines and humans work together, as per Accenture
