

# WILL MODI 3.0 BOOST TECH?

▶ **A third term gives the Modi government the advantage of continuity, with the tech sector being optimistic about upcoming changes**

▶ **The dream of Atmanirbhar Bharat will continue to drive growth by focussing on manufacturing electronics, including semiconductors**

▶ **Experts say India's first-of-its-kind Digital Personal Data Protection Act is a step in the right direction but the law requires revisiting**

▶ **Electric vehicles are at the forefront of green tech in India and annual policies like FAME should transform into five-year ones**

**IT'S A TECH-DRIVEN** world and India is on the fast lane to lead in tech knowledge and skills. Under the new government, much of the focus will be on continuing and expanding the policies initiated in the previous terms. Growth will likely depend on strategic reforms and initiatives in data protection, tech manufacturing, AI, green tech, digital literacy, semiconductors, and space tech.

There has been speculation about India's ability to produce high-quality hardware and software, and changes in key legislative decisions can cement the country's position in

global tech. In the road ahead, the IT ministry, with Ashwini Vaishnaw at the helm, will have to carefully plan and implement key bills to realise the full potential of the reforms.

## PRIVACY CONCERNS

The Digital Personal Data Protection (DPDP) Act and the umbrella regulation—the proposed Digital India Bill—have been works in progress. As Indians gradually shift to the online world, the implementation of robust data protection laws is the need of the hour. The bill aims to safeguard citizens' privacy while promoting the responsible use of data; it will tackle hate speech, misinformation, unfair trade practices, security and safety on the internet.

Jiten Jain, cybersecurity expert and Director at digital investigation services firm Voyager InfoSec, highlights the significant strides made in digital public services. "The government has aimed to put every single public service delivery online to elim-
