APPLE WATCH SERIES 9 WITH SPORTS LOOP BAND

₹41,900

If you want to invest in your health and that of the earth, get this

Guilt-free Pleasure

Yes, wasting paper is bad for the environment, but how do you doodle? Or how do you stop yourself from taking notes the old-fashioned way if you've done that for a lifetime? For a start, upgrade to this e-ink tablet, which comes with the Marker Plus Pen stylus for the pleasure of feeling pen on paper. Now, write, scribble, draw and annotate on this tablet to your heart's content—and transfer your hand-written notes into typed form, with just a touch. And voila, they're also accessible on your phone via the reMarkable app. This tablet has enough space to store thousands of pages, and on a single charge can be used for weeks, further reducing your electricity usage, making it a suitable choice for environmentally-conscious users.
