IN THE face of new requirements and technology, including the focus on sustainability reporting and the advent of AI, the Institute of Chartered Accountants of India (ICAI) is working on new courses to make chartered accountants future proof. In an interview with Business Today, 47-year-old Ranjeet Kumar Agarwal, President of ICAI, discusses these issues as well as the course of investigation into Byju's. Edited excerpts:

►►►

The ICAI has recently approved the policy document on the Centre of Excellence (CoE) and plans to set up nine such centres in the next three years. Can you elaborate?

The ICAI thinks it is now time to reskill and upskill our members as AI is now the backbone of any knowledge setting by any professional institution.

We believe the knowledge of AI is a required skill set for our members and the CoEs will help to reskill and
