

Change Catalysts for Generation Green: Green Frontier Capital's Bold Vision for a Sustainable Future

Green Frontier Capital, among other venture capital firms focused on climate, serves as a crucial catalyst for innovation, propelling advancements in climate change mitigation. Through targeted financial backing and strategic guidance, Green Frontier Capital enables dynamic Indian entrepreneurs committed to sustainable solutions, hastening the transition towards a more environmentally conscious future.

Sandeep Bhammer
Founder & Co-Managing Partner
Green Frontier Capital

Can you tell us about your background and what motivated your shift towards sustainability investing?

My journey began in 1995 (upon my graduation from my undergraduate studies at Boston College) navigating the intricacies of finance, particularly in investment banking roles at Credit Lyonnais, HSBC, and Citigroup. Transitioning to the buy

side in 2004 post my graduate studies at Cornell University, I assumed roles such as Asia Portfolio Manager at Amaranth Advisors, followed by positions at Balyasny Asset Management and DA Capital. However, amidst the challenges posed by the COVID-19 pandemic in 2020, I recognized an opportunity for change. Leveraging our expertise and connections, our Founding Advisors Prof. Soumitra Dutta (Oxford University) and Mrs. Punita Kumar-Sinha (ex-Blackstone), my Co-Managing Partner Rudra Dalmia (ex-PayTM), and I jointly founded Green Frontier Capital, driven by a shared commitment to effect positive global change and leave an enduring legacy of impact.

What sectors are prioritized in your investment strategy, and why?

Our investment strategy meticulously targets sectors with disruptive potential, vast consumer-centric markets, and minimal political influence. Key sectors include FoodTech, AgTech, Mobility, and Materials, offering significant opportunities for innovation and environmental impact. These sectors hold the greatest promise for effecting meaningful change while minimizing government involvement and/or influence in policymaking.

Dr. Punita Kumar Sinha
Founding Advisor
Green Frontier Capital

Our portfolio companies, such as Battery Smart, BluSmart Mobility, EMotorad, ElectricPe, Revfin Services, Nutrifresh, Zero Cow Factory, and KisanKconnect exemplify our dedication to fostering sustainability-driven innovation in these sectors. Additionally, we recognize the potential to infuse a climate-conscious perspective into almost every facet of our lives, from how we travel to our dietary choices and agricultural practices. This broad approach ensures we support a wide range of initiatives contributing to a net-zero, which is really a net-positive impact on the climate.

How do you select portfolio companies, and what criteria do you consider?

Portfolio selection is guided by a rigorous evaluation process, assessing founder expertise, market scalability, technological strength, and alignment with sustainability objectives. Our goal is to curate a portfolio that balances financial viability with measurable environmental stewardship, ensuring that each investment contributes to our overarching mission of sustainability. We start by examining the founders' backgrounds, focusing on their educational and professional journeys, especially prior ventures in relevant spaces. Additionally, we
