

Revolutionizing Banking Technology:

Nucleus Software's Legacy of Innovative Excellence

Three Decades of Trust, Vision, and Innovation

Vishnu R Dusad
Co-founder and Managing Director
Nucleus Software Exports Ltd.

Imagine a company that started its journey in a small garage office in Delhi with a bold vision of making financial services access easy and enriching worldwide in the late 1980s and, over the next thirty plus years, grew to become a global leader in banking and financial services technology. That's the story of Nucleus Software — a tale of relentless innovation, unwavering commitment, and transformative growth. From launching India's first online ATM to managing over \$1200 billion in loans worldwide today, Nucleus Software has been a beacon of excellence dedicated to the BFSI sector. At the heart of Nucleus Software is a mission to revolutionize the banking and financial services sector. Guided by visionary leadership of Mr. Vishnu R Dusad, the company has grown into a trusted partner for over 200+ financial institutions across more than 50+ countries. Whether it's Retail, Corporate & SME Finance, Islamic Finance, Automotive Finance, Transaction Banking, Mobile & Internet Banking, or Financial Inclusion, Nucleus Software has developed future-proof robust technology platforms that have end-to-end transformed financial services on a global scale. Central to Nucleus Software's achievements is FinnOne Neo®, a versatile digital lending platform that has been described as the Swiss Army knife of its kind. FinnOne Neo® simplifies the entire lending process—from origination to collections—offering a seamless experience for both institutions and their customers. With advanced features like sophisticated content and collateral management and omni-channel support, including web, mobile, and WhatsApp, FinnOne Neo® sets a new benchmark in loan management. Boasting a comprehensive 480+ API stack, FinnOne Neo® ensures robust, secure, quick, and agile integration, facilitating seamless interoperability with a wide range of systems, making integrability and compatibility with other providers paramount. Equally significant is FinnAxia®, a globally integrated comprehensive transaction banking platform that streamlines a wide range of functions, including receivables, payments, liquidity
