NEW ROUTE Bhavish Aggarwal, Founder of Ola Electric Mobility, says he wants to replicate the success of Maruti Suzuki India

Ambareesh Baliga. “A few other pure EV plays had been listed either due to reverse mergers or business restructuring, like Olectra Greentech (earlier Goldstone) or Wardwizard. Most of the other players are those that are still dependent on IC (internal combustion) vehicles but have diversified into EVs to be future-proof.”

Among the top EV manufactur-

ers in the country, Ola Electric had a commanding 38.7% market share during the first six months (January-June) of 2024, followed by TVS Motor (17.8%), Bajaj Auto (13.4%), and Ather Energy (10.6%), per data sourced from the government’s Vahan dashboard. This market dominance highlights Ola Electric’s strong foothold in the evolving Indian EV sector.

THE IMPACT

Besides Ola Electric, the IPO will positively impact Ola Cabs, Krutrim, and Ola Maps—other entities of its parent ANI Technologies—stimulating their growth, says Gupta of S&P Global. ANI Technologies may also consider integrating these businesses with Ola Electric later. The IPO will also enable Ola Electric to venture into additional segments, such as motorcycles, three-wheelers, and four-wheelers, he adds.

Meanwhile, reports say Ola Electric has shelved its plans for an electric car that was slated to be launched later this year, as it wants to focus on two-wheelers.

Competitive pricing may test the firm. Previously there were inci-

OLA ELECTRIC IS EXPECTED TO RAISE UP TO ₹6,146 CRORE AT THE UPPER PRICE BAND OF ₹76 PER SHARE

dents of Ola Electric scooters catching fire, which may also have some bearing. “We might see a price war coming up from Bajaj Auto or Hero MotoCorp. Once Ola starts selling in big numbers, Bajaj Auto and Hero MotoCorp will become aggressive with their ICE strategy and may work on thin margins. So, there will be a price war between the ICE and EVs,” says Gupta.

Bathini says that Bajaj Auto’s recently launched CNG bike may further intensify competition in the space. “One needs to see Ola Electric’s strategy with respect to rural demand,” he says.

For Ola Electric, it is still a long road ahead. **BT**
