

NMIA's cargo infrastructure will gradually be complemented by Multi Modal Logistics Park. ICTs will have its own dedicated pharma centres, which are dedicated processing zones for pharma shipments with various temperature ranges suited for different pharma products, considering the sensitivity attached to these shipments.

AAHL also plans to develop supporting infrastructure in terms of logistics park and warehousing facilities for consolidation/deconsolidation in airport vicinities which can support the trade ecosystem to consolidate their cargo and further feed into the airports, which in turn will augment volumes.

Additionally, AAHL intends to establish transshipment hubs at major airports like Mumbai, Navi Mumbai and Ahmedabad with ideal infrastructure and streamlined processes.

AAHL is also focused heavily on digital transformation of its processes and cargo ecosystem. As part of its digital focus, AAHL has taken initiatives, which have added immense value to the entire supply chain process.

AMAX/TEDI: It is an advanced electronic single window cargo community platform with access to all members for various transactions in the air cargo supply chain. It enables digital interactions between airport stakeholders like shipper, freight forwarder, customs broker, custodians, cargo handlers, airlines, transporters, consignees, customs, etc. It reflects the company's endeavour to

digitise the complete supply chain, reducing manual processes and increased efficiency. The same has been implemented at major stations such as BOM, AMD, LKO and other airports will follow.

Digital Docket Delivery: This is a functionality in AMAX/TEDI, which is also first of its kind in the world, wherein the cargo delivery is completely processed digitally, resulting in reduction of dwell time and logistics cost.

AAHL has been consistently setting new benchmarks in infrastructure, operational efficiency and digital transformation that brings in a great value to the community, thereby contributing to India's Economy and Nation Building.
