

Deepak Pandey: A Trailblazer in Solar Innovation and Sustainability

Deepak Pandey

Managing Director of GP Eco Solutions
India Limited (GPES)

Deepak Pandey, the enterprising Managing Director of GP Eco Solutions India Limited (GPES), is a driving force in the solar EPC sector. His leadership and relentless pursuit of innovation are shaping a sustainable future for global energy.

Deepak Pandey, the Managing Director of GP Eco Solutions India Limited (GPES), exemplifies transformative leadership in the solar EPC (Engineering, Procurement, and Construction) sector. Going beyond, he is taking his domain expertise to Solar Inverter manufacturing and distribution of solar products. His ascent from a B. Tech graduate to a pioneering entrepreneur highlights a relentless drive for innovation, excellence, and sustainable progress.

Deepak's career began with a clear vision for independence and success. In 2009, he launched a proprietorship, setting the groundwork for what would become a significant entrepreneurial journey. By 2011, this initial venture evolved into a private limited company, marking a key milestone. Deepak immersed himself in every facet of project management, from planning to execution, gaining practical experience that solidified his expertise. His commitment to excellence was further demonstrated when GPES transitioned to a public limited company in 2023, reflecting substantial growth and market success. In June 2024, it got featured in NSE Emerge delivering record gains, right on the day of listing.

The cornerstone of Deepak's success is his unwavering dedication and tireless work ethic. His journey is marked by significant milestones, including the

creation of Topline, which began with an investment of INR 1 million and grew to an impressive INR 1,360 million. This achievement not only showcased his entrepreneurial acumen but also fueled his ambition, setting the stage for his Big Hairy Audacious Goal (BHAG) of achieving a 1 billion USD revenue milestone.

Deepak's founding of GPES in 2009 was driven by a mission to champion the global transition to sustainable energy. Under his leadership, GPES has become a frontrunner in solar EPC services, focusing on manufacturing high-quality solar components, solar inverters, energy storage solutions and delivering innovative energy distribution solutions worldwide. The company's mission emphasizes excellence in solar EPC, pioneering advancements in solar component manufacturing, and expanding its global reach to enable businesses and communities to harness solar power while reducing their environmental impact.

Looking ahead, GPES aims to reach a revenue milestone of 1 billion USD within the next five years. This ambitious goal is supported by the company's commitment to driving innovation, delivering exceptional value, and maintaining a thriving work environment. GPES aspires to be a leading force in the solar industry, setting new standards for excellence and sustainability while contributing to a cleaner, greener

world. Deepak proudly says, "Our mission at GP Eco Solutions is to lead the global transition to sustainable energy. Every project we undertake is driven by our vision of a cleaner, greener future".

Deepak Pandey's inspiration for GPES stems from his deep-seated desire to make a meaningful impact on the global energy landscape. As he often says, "Sustainability is not a choice; it's a necessity. We are committed to reducing the carbon footprint and empowering communities through innovative solar solutions". His extensive hands-on experience and dedication to sustainability have been pivotal in shaping the company's mission and vision. His recognition as one of the 40 under 40 India 2024 leaders underscores his influential role in the solar sector.

In the short term, Deepak plans to further enhance GPES's solar EPC services and manufacturing capabilities. His long-term vision includes achieving the 1 billion USD revenue target and solidifying GPES's position as a global leader in sustainable energy solutions.

Deepak Pandey's journey is a powerful example of how visionary leadership, innovation, and a steadfast commitment to sustainability can drive remarkable progress and create a brighter future for all.
