

India@100 summit has evolved into a prestigious gathering that facilitates deep discussions and fosters connections across diverse sectors. Our commitment remains strong in driving forward the dialogue and actions needed to realize the vision of a prosperous and developed India by 2047.

The third Edition of Adani BT India@100 Summit, scheduled to be held on 20th August 2024, at Bharat Mandapam, New Delhi, is being organized at this crucial juncture when the new government has announced its intent to continue development initiatives and evangelize policies and measures to achieve high economic growth, create resilient infrastructure, and position India as a key growth engine for the world.

Given the scenario, the essential question is - how will the government drive sustainable and inclusive growth, focus on economic reforms, infrastructure development, education and skill enhancement, healthcare improvements, and environmental sustainability? Similarly, how can the industry unlock sector-wise growth to boost GDP, foster inclusion, usher in the digital economy, and protect the environment?

This summit will serve as a platform for the convergence of visionaries, business leaders, policymakers, and thought leaders to share insights and strategies, best practices and success stories, emphasizing the importance of fostering collaboration, innovation, and sustainable practices to turn India into a

developed nation by 2047.

Some of the key themes that will be explored at this annual summit

New Deal for Indian Agriculture

At the Adani BT India@100 summit, we are honored to host Shivraj Singh Chouhan, the Union Minister of Agriculture and Farmers Welfare, and Minister of Rural Development, for an insightful session titled "New Deal for Indian Agriculture" to discuss the transformative policies and strategies that are shaping the future of Indian agriculture. He will explain the challenges and opportunities in the sector, and how the government is working to create a more resilient and prosperous agricultural landscape. His insights will

be invaluable for understanding the path forward for Indian agriculture and the role it will play in the nation's journey towards 2047.

India@100: The State of Capitalism in India

For this session, we will be joined by one of the world's leading economic minds, Ruchir Sharma, on the state of capitalism in India and its implications for the future. He will delve into the successes and challenges that have shaped India's economic landscape and discuss the future trajectory of Indian capitalism in a rapidly changing global environment. His insights will provide a comprehensive understanding of how India can harness its economic potential to achieve sustainable and inclusive growth.

India: The Skill Capital of the World

To explore how India can leverage its demographic dividend to achieve sustainable and inclusive growth, we will host Jayant Chaudhary, Minister of State (Independent Charge) for Skill Development and Entrepreneurship, and Minister of State for Education, for a session titled "India: The Skill Capital of the World." During this session, Minister Chaudhary will explore the transformative potential of skill development in shaping India's future. He will discuss the government's strategic
