

and innovations driving the shift to green energy in India. Attendees will gain insights into how renewable technologies and supportive policy frameworks can empower organizations to lead the way toward a cleaner, more sustainable future, aligning with India's ambitious climate goals

Reforming the Almighty Sarkar

For this session, "Reforming the Almighty Sarkar!", we will be joined by NK Singh, Former Chairman of the 15th Finance Commission of India, to explore how the country can truly rise without overhauling its administrative, policing, and judicial systems, among others. As India strides towards its centenary year, the question of governance reform remains crucial. Is there a way to reinvent the steel frame of bureaucracy to enhance our institutional capacity and drive implementation, or is India destined to remain a middle-income country, struggling with internal and external challenges? Join us as we delve into these critical questions, seeking pathways to a stronger, more effective governance framework for a prosperous future.

The Rush for Jobs: Who Will Employ Them All?

With the focus on generating employment opportunities for the future, a session on "The Rush for Jobs: Who Will Employ Them All?" at the summit will tackle this pressing concern head-on. With panelists Manish Sabharwal, Vice Chairman of TeamLease Services; Dhiraj Nayyar, Chief Economist at Vedanta; and Dr. Laveesh Bhandari, President & Senior Fellow at the

initiatives to make India the skill capital of the world, focusing on the importance of skilling, reskilling, and upskilling in a rapidly evolving job market

Development While Decarbonizing: India's Path to Net Zero

With India announcing ambitious goals towards achieving net-zero emissions while maintaining robust economic growth. To delve into the future of sustainable development, we will be joined by Prof. Vikram Gandhi, a distinguished academic and a leading authority on sustainable investing and climate finance. Prof. Gandhi, Senior Lecturer at Harvard Business School, will do a deep dive into India's path to net zero, offering insights into the strategies and innovations needed to balance economic growth with environmental responsibility.

ESCAPING THE MIDDLE-INCOME TRAP

Recent discussions around the middle-income trap have been fueled by a World Bank study that highlights the daunting timelines emerging economies like India face if they continue on their current paths. The World Bank's 2024 World Development Report paints a grim picture, suggesting it could take India 75 years to reach just a quarter of the U.S. per capita income if significant policy shifts are not made. To discuss how India can become a "Viksit Bharat" and its ability to sustain high growth rates and

steering the nation clear of the middle-income trap and toward a prosperous future, we will be joined by Dr. Arvind Panagariya, Chairman of the 16th Finance Commission of India, who will provide insights into how India can navigate the middle-income trap and chart a course toward becoming an economic powerhouse by 2047.

Navigating the Green Energy Transition

As the world faces the urgent need to transition to sustainable energy sources, the session on "Navigating the Green Energy Transition" at the Adani BT India@100 event promises to be a pivotal discussion.
