

Our entrepreneurs are already developing groundbreaking solutions. By fostering strategic partnerships and a supportive regulatory environment, we can harness this potential further.

● **MOONSHOT 3**

Infrastructure as a Launch-pad: A thriving start-up ecosystem needs robust physical and digital infrastructure. Investing in infrastructure will improve lives and fuel start-up innovation and sustainability.

● **MOONSHOT 4**

Financial Fuel for Start-ups:

Capital is the lifeblood of any start-up. A robust financial ecosystem is essential. Flexible loans, equity-based financing, and public market access are key to providing start-ups with the capital they need to scale.

● **MOONSHOT 5**

Regulatory Sandboxes for Innovation: By creating regulatory sandboxes, we can allow start-ups to experiment with

new business models without being bogged down by red tape. Streamlined regulations and an improved ease of doing business will attract more entrepreneurs and investors.

● **MOONSHOT 6**

Make for the World:

Indian start-ups are gaining global recognition. To accelerate this, we need policies supporting cross-border operations and partnerships.

● **MOONSHOT 7**

Inclusive Growth for All:

To achieve inclusive growth, the start-up revolution must extend beyond urban centres. Supporting start-ups in Tier II and III cities can create jobs and bridge the urban-rural divide.

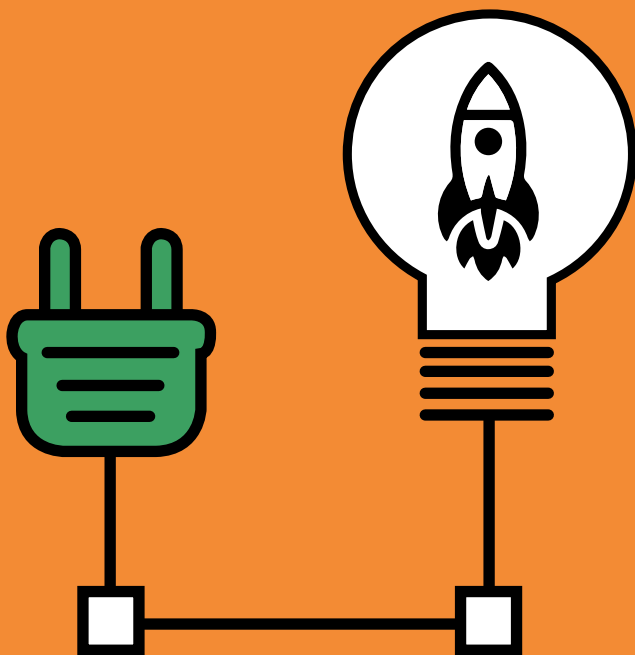

● **MOONSHOT 8**

Focus on Sustainable

Growth: As India grows, it must do so sustainably. Transitioning to a low-carbon economy, promoting renewables, and adopting sustainable practices is imperative. Green tech start-ups can spearhead this change by developing innovative solutions.
