AS INDIA APPROACHES its centenary of Independence in 2047, the Adani BT India@100 Summit underscored the opportunities and challenges the nation faces on its path to becoming a global economic powerhouse. While the nation boasts of being on a growth high, deep-rooted challenges still cast a shadow over the potential of the country in achieving the dream. The world's fifth-largest economy foresees surpassing Japan and Germany by 2027. Projections also place the manufacturing sector (value-added) at \$257.3 billion by 2027 from the current \$232.3 billion.

However, growing inequalities and unemployment pose challenges that seem Sisyphean. Add to that the growing worries about geopolitical instabilities, and a relentless inflation rate, and India could lose its footing. In this backdrop, policymakers and leaders of India Inc. gathered on August 20 at the Leaders' Lounge, Bharat Mandapam in New Delhi to discuss strategies for shaping India's future, and ensuring equitable and holistic growth. **BT**

FOCUS ON AGRICULTURE

Shivraj Singh Chouhan, Union Minister of Agriculture and Farmers Welfare, Minister of Rural Development

Chouhan spoke about the challenges faced by farmers and outlined the government's strategy to enhance their income and ensure the country's food security. He articulated the government's plan to continue increasing farmers' income while meeting the food demands of India's growing population, which is expected to reach 1.6 billion by 2047
