Bhavish Aggarwal, Founder, Ola

"India needs to bring strong policy and implementation of policy on data sovereignty, data residency, data management as well as data decision-making," said Aggarwal

He explained that with Ola Cabs, Ola Krutrim, and Ola Electric, he aims to change the digital ecosystem in India by making it more India focussed, adding that with 20% of the world's

growth happening here, India is poised to increasingly set the global agenda

Aggarwal, whose projects include Bharat Cell, also discussed his ambitious vision for India's role in the global energy sector. He spoke about the shift from a petroleum-based energy model to one centred on renewable energy and storage, calling it "a technology paradigm"
