

Steeling Up for a Global Atmanirbhar India by 2047

As India has an ambitious target to achieve by its centenary year, Shri Amitava Mukherjee, CMD (Additional Charge), NMDC is steering the Navratna CPSE towards its vision of becoming a 100 million tonne mining company to ensure the nation's mineral security and self-reliance.

Shri Amitava Mukherjee
CMD (Additional Charge)
NMDC Limited

Under your leadership, NSL has added several feathers to its cap, including getting NSL listed on the Bombay Stock Exchange in February 2023. What did it take to achieve this milestone?

It has been a stupendous journey for NSL, which has stood tall and strong on its feet, with the listing of NMDC Steel Limited (NSL) on the Bombay Stock Exchange in February 2023 standing out as a particularly notable achievement. This milestone marked a new chapter in NSL's growth.

As a separate entity now focused on steel production, NSL's listing not only strengthened its market position but also aligned with India's ambitious goal of reaching a 300 million tonnes

steel production capacity by FY30. This listing resonates with NMDC's broader objectives and success, including being the first mining company in India to reach the 45 million tonnes milestone in iron ore production. NMDC's robust production capacity has provided the critical raw material base and financial strength needed to support NSL's operations and strategic objectives, paving the way for its demerger from NMDC and its eventual listing on BSE, NSE, and CSE with an equity base of ₹2,930 crores, where it is presently performing well on the bourses.

Officially dedicated to the nation by the Hon'ble Prime Minister of India, Shri Narendra Modi, on October 3, 2023, this state-of-the-art facility not

only contributes significantly to the economic development of the Bastar region but also positions NSL as a key player in the steel industry.

NSL has already begun making strides towards achieving key milestones, such as the production of 1 million tonnes of Hot Rolled (HR) coils within its first year of operations. These achievements highlight NSL's capacity for operational efficiency, technological advancement, and a strong commitment to quality. The listing on the Bombay Stock Exchange was a natural progression, providing NSL with the necessary capital market access to fuel its expansion plans and continue contributing to the nation's steel production goals.

This accomplishment underscores our deep commitment to transparency, accountability, and building trust with our investors. The increased market significance that comes with this listing is crucial for our ability to capitalize on emerging opportunities and drive sustainable growth.

Among your major contributions to the mining sector is revamping and bringing about a strong digital transformation in the industry. What are the dividends that it is now giving to the mining sector and the overall impact on its efficacy?

At NMDC, we are proud to be trailblazers in the Indian mining sector, especially in integrating advanced technologies like Artificial Intelligence (AI) intervention. As global challenges disrupt traditional business models, NMDC's forward-looking digital strategies are aligned with the principles of Industry 4.0, creating a more interconnected and automated mining environment.

Our comprehensive digital roadmap includes leveraging cutting-edge technologies to enhance productivity per capita and optimize cost-effectiveness. Guided by our IT mission, "Work Lean, Deliver Faster and Smarter," we are integrating real-time data systems to enable rapid, well-informed decision-making. Key initiatives include the deployment of an advanced ERP system that integrates multiple facets of our operations - production, sales, finance, and human resources - facilitating seamless data flow and enhancing decision-making and resource allocation efficiency.
