

Towards Zero

The year 2047 is a key milestone in India's target to reach net-zero emissions by 2070. The country needs to mobilise the financial resources to improve renewable energy generation and foray into nuclear power and green hydrogen

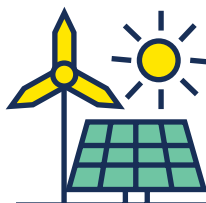

BY RICHA SHARMA

NET-ZERO ROAD MAP

Increase India's non-fossil energy capacity to 500 GW by 2030 from 203 GW currently

Generate 50% of energy requirements from renewables by 2030
