

STRONG AND SHINING

Positive demographics, tech, and economic growth to make the Indian stock market more resilient by 2047

India's young population is expected to drive consumption and economic growth

Street Smart

The Indian economy is expected to touch \$30-35 trillion in 2047 from \$3.93 trillion in 2024. That is expected to have a ripple effect on the stock markets and equity investors are set to benefit
