

ADANI ENTERPRISES LTD BUILDING INFRASTRUCTURE ASSETS CRITICAL TO INDIA'S PRESENT AND FUTURE

AEL SHARES HAVE GENERATED OVER 35% CAGR SINCE LISTING IN 1994

For over 30 years, Adani Enterprises Limited (AEL), the incubation engine of the Adani Group has been at the forefront of building infrastructure assets critical to the nation's present and future. As one of the most successful incubators, AEL has a track record of building some of India's largest utilities and transport businesses including:

- Adani Ports and SEZ – India's largest transport & utility company
- Adani Power – India's largest private power company
- Adani Energy Solutions (erstwhile Transmission) – India's largest energy solutions company
- Adani Green Energy – India's largest renewable company
- Adani Total Gas – India's largest city gas distribution company

AEL leverages its strengths in innovation, entrepreneurship and execution to incubate new businesses in high-growth sectors. With a vision to become a global leader in sustainable infrastructure and renewable energy, it creates value for its stakeholders and society at large.

AEL's incubation model over the years has focused on building emerging infrastructure businesses, contributing to nation-building and once these businesses mature, divests them into separate listed entities. Having set their sights on making the country self-reliant with the current portfolio of robust businesses, the next generation of strategic business investments will be centered around full spectrum green hydrogen production, airport management, data centers and road infrastructure.

The incubation of these businesses under AEL continues to progress well. AEL's present set of strategic business investments is centered around:

I) UTILITIES:

Adani New Industries Ltd (ANIL): The business is building India's largest full-spectrum green hydrogen production chain, including solar modules and wind turbine manufacturing in Mundra SEZ. Currently, the operational capacity includes 4 GW of cell and solar module manufacturing, 2 GW of ingot and wafer manufacturing and 1.5 GW of wind power. It's an integrated green hydrogen hub having land availability, supporting infrastructure, and large

industry cluster. The platform is uniquely positioned to offer scale and high efficiencies. ANIL Ecosystem's solar manufacturing and wind turbine businesses have recorded highest ever EBIDTA of Rs. 1,642 crore with an increase of 3.6x on Y-o-Y basis and now contributes 38% to total EBIDTA on back of its robust operational performance.

It is building the world's first fully integrated and comprehensive ecosystem of Solar PV Manufacturing, encompassing the production of Metallurgical Grade Silicon, Polysilicon, Ingots, Wa-
