Shantanu Roy, CMD of BEML Ltd, also mentioned the role of the domestic economy in the company's performance. "Despite global uncertainties, the Indian economy has demonstrated remarkable resilience, achieving robust growth rates driven by strong performance across manufacturing, services, information technology, and agriculture," he wrote in BEML's annual report for FY24, noting that as the fifth-largest economy with a projected growth rate of around 7%, India offers a wealth of opportunities.

Meanwhile, Union Minister of Heavy Industries H.D. Kumaraswamy recently said that CPSEs will have a big role to play as India aims to be among the Top 3 economies in the next few years. "CPSEs will have to move forward rapidly and increase their role in the development of the country. This development should be sustainable and environmentally friendly," he said at a recent conference on the annual performance review of CPSEs.

THE BANKING STORY

Sector-specific policy reforms and investments have also boosted PSUs. Bad loans or non-performing assets (NPA) of PSBs had been a major concern in the past decade. According to CMIE Industry Outlook data, when the BJP-led NDA government took charge in FY14, the Gross NPA (GNPA) for PSBs was at ₹2.17 lakh crore, and GNPA as a percentage of gross advances was at 4.7%. When RBI initiated an asset quality review to clean up bank balance sheets in 2015, PSBs' GNPA spiked from ₹2.79 lakh crore in March 2015 to ₹5.4 lakh crore in March
