

CURRENT PORTFOLIO

● Athera believes in investing in a wide array of sectors ● HealthifyMe has been its biggest investment in recent years

NAME OF COMPANY	AMOUNT INVESTED (₹ CRORE)	CURRENT MULTIPLE	INDUSTRY
MoveInSync	15.9	10.5x	Employee transport management solutions
Tricog Health-care Services	35.9	3.1x	ML-based real-time cardiac diagnosis on the cloud
Vunet	14.0	2.0x	AI-driven unified business observability platform
Pixxel	35.8	1.9x	Designs and operates low-earth imagery satellites
Clootrack	15.0	1.6x	Provide consumer insights to brands
HealthifyMe	56.8	1.4x	App for tracking health and connecting with fitness coaches
BluArmor	10.0	1.3x	Smart helmets and accessories
Euler	47.0	1.0x	Three-wheel cargo electric vehicles OEM
Ati Motors	16.1	1.0x	Industrial smart manufacturing
Terra	7.2	1.0x	Intelligent automation for finance process
ClickPost	19.7	1.0x	End-to-end logistics management
Playshifu	39.0	0.8x	Educational toys & games for kids

SOURCE ATHERA VENTURE PARTNERS

investment in Euler Motors, an electric vehicles (EV) manufacturer. What swung the deal was the insight from the Founder, Saurav Kumar. A traditional car company optimises its production line with one thing in mind—that 80% of it is made of steel. EV is a different proposition, though. “When he said 20% was steel and 80% everything else, it seemed very simple but was in fact a huge insight,” says Doshi.

That goes to the heart of the Athera approach: find a complex problem, simplify it, and then figure out a way to crack it. “When you look at Pixxel or BluArmor, its founders are really first-principle thinkers and possess high levels of confidence in their ability to get it right or just put in all the effort needed. They are even-tempered individuals, and that is a trait we like,” explains Mehta.

The strong emphasis on technology, too, has many parts to it. “Since it cannot be replicated easily, that lays the base for differentiation. It is the

moat around which businesses get scaled and also leads to high entry barriers,” feels Naman Vijay, Co-founder and CEO of ClickPost, an end-to-end logistics company. Athera invested ₹19.7 crore in it this April.

Vijay says vertical software, or software designed for a specific industry or market, “is a nice space” to be in. The evolution from being a developer to solving a business use case has helped. “We are highly focussed on serving Indian D2C brands and retailers.” He adds that getting it right in this space leads to very high levels of stickiness from customers.

The team at Athera will be hoping that Vijay continues to get it right as they ambitiously chart out their next high-return exit. Their simple, logical investment approach is clearly proving to be the magic formula for success.
