

ADANICONNEX: TAPPING INTO DATA CENTER GROWTH

Digital technology and mobility are integral to our everyday lives. Being connected has made distances shorter, tasks simpler, and life more convenient. Businesses are focused on digital transformation with remote workers, artificial intelligence (AI), machine learning, Internet of Things (IoT), blockchain, and new technologies shaping their future. Data centers are now more than ever critical infrastructure that need to keep pace with the new wave of niche digital solutions and technology that are built to deliver real-world impact. This has led to big domestic as well as global infrastructure firms investing billions to build data center infrastructure in the country. Although still at a nascent stage, India's data center market stands out prominently, accounting for 1.5% of global data center capacity.

The Adani Group joined hands with the leading global data center operator EdgeConneX to set up data centers in India. Supported by the team from EdgeConneX and their more than a decade of experience in building a global platform of data centers for some of the world's largest and most demanding technology and cloud firms, AdaniConneX is rapidly executing its plan to deliver 1 GW hyperlocal to hyperscale data center capacity in the country.

AdaniConneX is creating new market opportunities that are reshaping industry dynamics. As the market is undergoing a significant transformation with the rise of AI, AdaniConneX is developing innovative solutions in close collaboration with partners and the entire ecosystem to meet the evolving needs of customers. This collaboration aims to fuel India's digital ecosystem through reli-
