

"Nagpur is very strategically located. And therefore it's actually at the vantage point for growth. Globally data has been suggesting that the growth is going to be driven by the tier 2 cities. Nagpur's infrastructure if I may say is almost 20 years ahead of its time, which is very unique for tier 2 cities."

Vaibhav Dange, Member BoG, IIM Nagpur

"At our signature Zero Mile Samvad, we have had various sessions and topics, from the policy, technocrat, startup, sustainability, green energy and culture and entertainment industries. These insightful conversations with distinguished speakers will drive India towards achieving its \$5 trillion economy ambition. IIM Nagpur has become an epitome of excellent infrastructure on a national scale due to Shri Gadkari Ji's advice, guidance, and support, and we are focused on furthering this advancement."

Dr. Bhimaraya Metri, Director, IIM Nagpur

"The theme 'Shaping India's Triumph to a \$5 Trillion Economy and Beyond' is relevant when the nation is at the cusp of transformative changes. What better way to deliberate on the nation's growth trajectory than amongst a congregation of academia, industry leaders and policymakers! Such dialogues foster a collective understanding of aspirations, perspectives, opportunities and challenges. The global community has acknowledged India's rise in a non-threatening manner and our responsible power stand. India's growth in stature brings with it recognition, additional responsibilities and opportunities, and challenges, and we need to ensure that our national interest remains paramount."

Gen. Manoj Pandey, Chief of Army Staff, Indian Army
