in merchandising.” He says they play a crucial role in the parent’s revenue generation, but it is difficult to quantify the exact amount.

In fact, many GCCs boast of a significant presence of senior- and global-level leadership here, which is evidence of the strategic importance that Indian centres play within the organisations. Sudish Panicker, MD, BNY Mellon India, says ownership within GCCs has expanded, extending across functional, product, and application domains. “This brings more leadership positions. These are folks who have teams across the world reporting to them while they are stationed out of a GCC and drive a global strategy,” says Panicker, who is also the Global Head of Accounting Services. Lowe’s India houses 120 leadership positions at the director-level and above. Mittal emphasises that a mere 10-15 per cent of these roles are exclusively India-centric. “A person owning a capability owns it globally. For instance, I oversee the search function of Lowes.com globally.”

The GCCs also strive to mirror their headquarters through their grade-A office spaces across Tier I cities in India. Rakuten’s Bengaluru office, for instance, exudes a distinct Japanese ambience. Real estate consultancy firm Knight Frank India’s Senior Executive Director for Occupier Strategy & Solutions, Industrial & Logistics, Capital Markets & Retail Agency, Viral Desai, points out that the fastest growing office space categories today are the India-facing companies and GCCs. “The GCCs are north American and European firms from traditional sectors such as banking, pharma, oil and gas, etc. They have two major costs—people and office space. GCCs typically require 40,000-50,000 sq. ft area, which can accommodate 400-500 people. But it can go up to 600-700 people because of hybrid work,” he says, adding that they really invest in fit-outs. Says BNY Mellon’s Panicker: “One of the things we are clear about is that employees across locations will get world-class infrastructure.” The bank’s new office in Chennai, spanning 10 floors and more than 400,000 sq. ft, is its largest facility outside North America and can house 6,000 people.

DESPITE THIS GROWTH, attracting and retaining talent remains a challenge for GCCs. Data from HR consulting firm Aon shows that their attrition and salary increments remain in the double digits. One of the hurdles acknowledged by GCCs is the initial struggle in recruiting and retaining individuals, given that the majority of tech talents prefer em-
