

HOTSPOTS

► Bengaluru, Hyderabad, Chennai, Mumbai, Pune, and Delhi-NCR remain popular sites for GCC establishments in India

► But, Tier-II cities are also grabbing the interest of GCC leaders

72 | **SOURCE** EY'S GCC PULSE SURVEY 2023, SEPTEMBER 2023

ployment with tech or product-focussed companies rather than, say, in retail. But we have our edge, the GCCs say. Panicker says GCCs offer their employees a breadth of roles because of the multiple functions many of them have going on. "You could come into an engineering role and move into business, operations, risk or finance. That is a powerful thing."

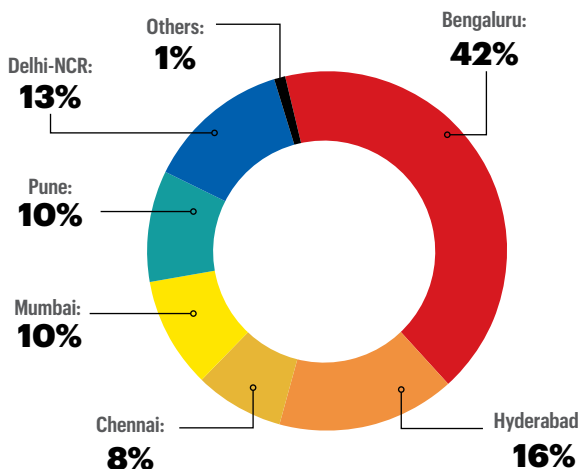

Acknowledging the attrition, Arindam Sen, Partner and GCC Sector Lead-Technology, Media & Entertainment and Telecommunications at consultancy firm EY, points out that it has decreased from 35-40 per cent during the pandemic to 15-16 per cent now. Besides, with the cost play out of the equation in many cases, firms are able to pay competitively. Hiring skilled talent in India, even at a slightly higher cost, is still significantly more cost-effective than engaging expensive contractors in regions like the UK, Sweden, or the US, says AstraZeneca's Padmanabhan. "Even if the salary average moves up, we are not worried as long as the value is proportionately higher. It is still only a third or fourth of what we would be paying somewhere else."

The slowdown in IT is also helping GCCs to some

SPREADING WINGS

► GCCs now account for nearly 40 per cent of all occupied Grade A stock across the top six cities. Bengaluru occupies 42 per cent of the country's total 202.6 million sq. ft of GCC office space

► Besides, office rentals in India are among the lowest compared to other APAC cities

NOTE DATA INDICATES SHARE IN GCC OFFICE SPACE
