

NMDC: SETTING BENCHMARKS WITH RESPONSIBLE MINING PRACTICES

The National Mineral Development Corporation is making headlines with its 360-degree achievements in making India self-reliant in minerals of national interest. Mr Amitava Mukherjee, Chairman and MD shares the journey of the Navratna CPSEs progressive transformation.

When you took over as CMD (Addl.

Q Charge) of NMDC in 2023, what were the challenges that needed your immediate attention to be addressed?

At the outset of 2023, we had three key priorities - giving impetus to infrastructure that fuels the vision of 100 million tonnes by 2030, expanding our mineral and geographical footprint and commissioning NMDC Steel Limited.

Setting the momentum for 50 million tonnes, the implementation of an all-inclusive Pricing Mechanism for iron ore, operationalization of the Kumar Marenga intermediary stockyard, and the achievement of the highest-ever Q1, Q2, Q3 volumes in company history are crucial milestones of 2023 towards enhancing our production and evacuation infrastructure. This coupled with the new 'Works Organisation' at NMDC is focussed on completing projects in the pipeline towards building the 100 million tonnes capacity.

Further, the operationalisation of our gold mine at Mount Celia in Western Australia testified to our purposeful, prudent and productive approach to global expansion.

In August 2023, NMDC also commissioned the Nagarnar Steel Plant putting Bastar on the Steel map of India. Today, NSL is swiftly progressing towards normal production showcasing agility, efficiency, and a strategic vision for sustained growth in the steel industry.

Q What were the smart strategies and SOPs that ensured NMDC's chartbusting performance?

In our standing as the largest iron ore producer of India commanding one-sixth share of the domestic market, an immersive vision for sustained growth was imperative. We have devised a robust strategic management plan aimed at achieving targeted production outputs: 47-49 million tonnes (MT) for FY24, 67 MT for FY26, and 100 MT capacity by FY30.

Amitava Mukherjee
Chairman & Managing Director
