

DHOLERA: A GREENFIELD SMART CITY FOR SMART BUSINESSES

As a part of the VGGS 2024, a seminar on “DHOLERA: A Greenfield Smart City for Smart Businesses” was organized to showcase Dholera’s distinctive features and place Dholera Industrial Smart City on the world map as the most favorable investment destination.

Senior decision-makers, industry leaders and stakeholders came together to share insights and highlight the significance of greenfield smart cities as a paradigm shift in industrialization and urbanization. The discussion explored revolutionary urbanization strategies, sustainable infrastructure, technological advancements, and inventive solutions for establishing more environment-friendly and intelligent cities of the future.

EVENT HIGHLIGHTS

Union Industries Minister Shri Piyush Goyal hailed Dholera as a future model for a greenfield city. He expressed that the Dholera Greenfield Smart City envisioned with a focus on smart, green, and highly developed urbanization, will set an example for other states. The Government of India also plans to establish several greenfield cities inspired by Dholera in the future. Thanking the visionary thinking of the Prime Minister, he showcased Dholera’s evolution over the past two decades, emphasizing its transformation from an empty plot to a location with plug-and-play infrastructure for industries.

Industries Minister Shri Balvantsinh Rajput highlighted that during the tenure

of Prime Minister Shri Narendra Modi as the Chief Minister of Gujarat in 2009, the Dholera Smart City project was initiated. Dholera Smart City boasts world-class infrastructure, and factors like peace, safety, security, and good governance, along with the proactive approach of the state government, make it an attractive investment destination.

Mr. Supreet Singh Gulati, Managing Director, Dholera Industrial City Development Ltd, observed that Dholera stands as a symbol of smart & sustainable infrastructure development that is designed keeping the inclusivity of the present and future businesses. The city is designed to prioritize the well-being of its residents offering high quality of life, walkable bicycle-friendly neighbourhoods, along with public art & cultural spaces, world-class educational institutions and healthcare facilities to cater to the needs of the communities

Dr. Praveer Sinha, Managing Director, Tata Power Company Ltd. If we can have cities in the Middle East out of nothing, Dholera is much better placed as the city of the future. The roadmap has been set up by the government demonstrating

that this is the place where future activities will happen. I’m sure there is an opportunity for all of us to set up more and more facilities and enjoy the benefits of smart city.

Mr. Rajat Kumar Saini, CEO & MD, National Industrial Corridor Development Corporation. Dholera is one and half times the size of Singapore. It is very different from a normal industrial park. We are creating plug-and-play infrastructure, which also ensures walk to work concept, so people will not just come and work but they will also live there. They will utilize the housing, educational, healthcare, recreational and other social infrastructure that will be created soon.
