

RENEWABLE ENERGY: PATHWAY TO A SUSTAINABLE FUTURE

Gujarat has been at the forefront of the renewable energy sector nationwide, continually implementing mega projects in solar and wind energy.

Speaking at this seminar, Chief Minister Shri Bhupendra Patel stated that Gujarat can lead the nation towards a sustainable future, aligning with Prime Minister Shri Narendra Modi's vision of the three key pillars of green growth and energy transition. He highlighted Gujarat's commitment to the Prime Minister's threefold objectives: increasing renewable energy production, reducing reliance on fossil fuels in the economy, and transitioning towards a gas-based economy.

Providing an overview of Gujarat's achievements in the renewable energy sector, the Chief Minister highlighted that the state, driven by the vision of the Prime Minister, has positioned itself as a frontrunner in renewable energy at the national level. Gujarat's contribution to the country's overall renewable energy capacity stands at 16 per cent. With an installed capacity of 11 GW in wind energy, Gujarat leads the nation in this sector, and

it also holds the top position in solar rooftop installations across the country.

Minister of Energy Shri Kanubhai Desai affirmed Gujarat's dedication to excelling in the renewable energy sector. Presently, Gujarat has garnered international recognition for its achievements in solar and wind energy. The state contributes 15% to the total renewable energy production in the country. The Gujarat Government is actively working towards establishing the state as a hub for renewable energy, aiming for global recognition.

Union Minister of State for Renewable Energy Shri Bhagwant Ghuba praised Gujarat's progress in the renewable energy field, noting that Prime Minister Shri Narendra Modi's commitment to carbon emission reduction is materializing. He expressed confidence that India will successfully achieve the target of 300 GW in the renewable energy sector by 2030.
