

TRANSFORMING GUJARAT INTO A 'GLOBAL HUB FOR SEMICONDUCTOR AND ELECTRONICS MANUFACTURING'

The country's first Make in India chip will be produced in Gujarat in 2024: Union Minister Shri Ashwini Vaishnaw

Addressing the Semiconductor and Electronics Seminar on the second day of the tenth edition of the Vibrant Gujarat Summit, Chief Minister Shri Bhupendra Patel conveyed confidence in positioning Gujarat as a 'Global Destination for Semiconductor and Electronics Manufacturing' under the guidance of Prime Minister Shri Narendra Modi. In this context, he highlighted that Gujarat stands as the pioneer in the nation by being the first to announce a semiconductor policy. The rapid proliferation of technology across India is evident, with smart technology integration escalating in sectors such as health, agriculture, and logistics, impacting various facets of human life. The pervasive influence of the Internet of Things and Artificial Intelligence in daily life highlights the pivotal role played by semiconductor chips and electronic devices. Recognizing the global demand for a dependable chip supply chain, Gujarat will play a crucial role in this evolving landscape.

Outlining Gujarat's roadmap for this initiative, the CM affirmed the state's commitment to being a frontrunner in emerging global sectors such as AI, I.T., Biotech, Fintech, Drones, and Semiconductors. Expressing determination to establish a 'Future Ready Gujarat for a Future Ready India', the Chief Minister emphasized their dedi-

cation to realizing Prime Minister Narendra Modi's vision of AatmaNirbhar Bharat, with a particular focus on emerging sectors like Semiconductor-Electronics.

On this occasion, the Union Minister of Electronics and Railways, Shri Ashwini Vaishnaw, emphasized that the Vibrant Gujarat Summit is a visionary model launched by the Prime Minister. He highlighted how it has ushered in new technology and industries in Gujarat. Referring to this edition as the first Vibrant Summit of Amrit Kaal, the Union Minister highlighted the significance of the MoU inked during this summit. He asserted that these agreements mark the beginning of Viksit Bharat, with Gujarat having the capability to effectively realize the Prime Minister's vision.

The Union Minister also announced that Gujarat is poised to manufacture the country's first Make in India chip in 2024.

During the seminar, Sanjay Mehrotra, the CEO of Micron, conveyed his appreciation for the exceptional cooperation from the state government and the Government of India. He stated that India is on the brink of establishing a robust semiconductor supply chain in the near future.

During the Semiconductor and Electronics Seminar, MoUs were signed between the Gujarat Government and the Korean company SIMMTECH. Additionally, cooperation agreements were forged between Micron and Nantech, as well as Cisco and Nantech. The seminar witnessed the presence of distinguished individuals, including Senior Deputy Director Tanaka Kazus-inghe, Smt. Suman Bery from Niti Aayog, Chief Secretary of the State Shri Raj Kumar, Secretary to the Government of India Shri S. Krishnan, Principal Secretary of the State Smt. Mona Khandhar, and other dignitaries.
