

What are the initiatives that you have launched for confidence-building and imparting skills to make them industry ready, and also the alumni support that you get?

I take immense care in creating skill based and confidence building platforms inside our campus to students, where technical, artistic, cultural and sporting talent is identified, trained and given plethora of opportunities to students. We have 40+ vibrant student development clubs in our campus encouraging technical, artistic and cross-cultural exchange activities.

An exclusive Skill Development Centre and NEXTGEN lab was established to nurture the skill set of the students. Centre for Advanced Studies encompasses the spectrum of modern avenues pertinent to areas of emerging technologies such as AR/VR, Drone Experimentarium, and an advanced Media Centre facility.

Our alumni engagement is phenomenal; we conducted International Alumni Meet last year and had a greater connect with our global footprints. Our alumni are actively contributing in curriculum revision, industry engagement and in hand-holding the holistic student development.

Could you share the student exchange and research collaborations that Sathyabama has with foreign educational institutions and their outcomes?

We have a strong academic partnership with international academia. Our alliances with overseas universities resulted in numerous faculty exchange programs, Summer schools, Twinning programs, Internship abroad programs, International week participation, student semester abroad programs

and MoUs to facilitate research and academic collaboration. We have a dedicated Centre for Academic Partnership & International Relations working consistently for creating and maintaining strong nexus with international community.

Mention some out-standing research initiatives that Sathyabama has launched and the ambience that you provide to ensure that scientific temper thrives on the campus?

Sathyabama Research Park, International Research Centre and 15 centres for research excellence, comprising modern research facilities fostering research activities in the campus. Expansion of research infrastructure in par with global standards contributed for our scientists' presence in TOP 2% in Stanford list. Best thesis award, highest publications awards and other research incentives boosted the research pace in the institution. Seed money grants are given to encourage the innovative ideas among faculty, students and scientists. Around 13000 + highly rated publications, 850+ patents and 50+ start-ups are achieved due to encouragement given for research activities.

Campus-hiring is considered a benchmark by students when they opt for an institution of their choice for higher education. How has the campus placement scenario been for Sathyabama post Covid?

Pre and post-covid, campus recruitment continues with dream company offers and highest salary packages to our students by major IT firms and core companies. We have a robust placement training process to students, identifying their Strengths, weakness and tailor-made programs are offered to enhance the employability opportunities. For the

present final-year batch, more than 400 eminent recruiters participated in the Campus Recruitment and rolled out more than 3000 Offers. Around 90% is the average placement percentage of our institution in the past few years (especially during pre and post pandemic period).

In terms of campus amenities, how does Sathyabama stand out as an institution with a difference?

We stand apart in terms of "Student Life" in the campus. Campus amenities support the student aspirations in terms of research and placement opportunities along with academic opportunities. Learning becomes simple with digitization facilities, sophisticated laboratories, specialized blocks for cutting-edge technologies and advanced studies, chain of canteens with multi-cuisine, lush green landscapes, spacious playgrounds, amphitheatres, and world class Indoor stadium.

What is the vision forward of your institution in the near future with a message to the youth of this country?

My vision is to see Sathyabama Students as the architects, leaders, social entrepreneurs of tomorrow's growth engines of the world. We often say in our campus, "Your career begins here". This is right in word and spirit, a student entering into campus can reinvent themselves towards reaching out their career aspirations. The aim is to make sustained efforts in shaping the careers of young minds, those who wish to excel in their chosen career paths.

I wish and hope that youth of this great Nation shall be the source and destination for the intellectual talent pool of the globe. I aspire and encourage every young mind to equip them to make this hope into reality.

Center of advanced studies, Sathyabama
