take the unintended consequences of any new technology along with all the benefits, and think about them simultaneously—as opposed to waiting for the unintended consequences to show up and then address them”.

Responding to a question from India Today Group Vice Chairperson and Executive Editor-in-Chief Kalli Purie on whether the AI race can cause as much harm as the arms race, Stuart Russell, Professor of Computer Science at University of California, said AI could even cause a lot more harm. “It can essentially make it impossible to have a functioning democracy and society,” he warned.

An analysis by the International Monetary Fund (IMF), released a
