day before the forum began, warned that AI had the potential to reshape the global economy, especially in the labour markets. “Advanced economies will experience the benefits and pitfalls of AI sooner than emerging market and developing economies, largely due to their employment structure focussed on cognitive-intensive roles,” it said. Deputy Managing Director Gita Gopinath said about 40% of jobs globally are vulnerable to the impact of Generative AI.

While the debate on the impact of AI remains open, the question marks that had lingered on in the frigid Davos air from last January have been answered to a large extent. The fear of a global recession is mostly past and the runaway inflation that has
