

## **SWIMMING WITH SHARKS**

The idea of coming face to face with one of nature's most agile predators may not be everyone's idea of a New Year celebration but make 'overcoming your fears' your New Year resolution and jump in. To be honest, swimming with sharks is actually much safer than you think. You can either scuba dive with sharks in many parts of the world or swim with sharks in cage diving, where swimmers are put in protective cages that sharks are not able to penetrate. Some popular destinations include Hawaii, South Africa, Australia and the Bahamas.
