

## RETAIL QUEEN

**Isha Ambani, 32**, may be donning many hats at Reliance Industries, but her role as Executive Director of Reliance Retail Ventures is most crucial. Within three years, she has doubled the retail venture's valuation to \$100 billion. She has also been aggressively expanding its footprint. Since valuations are at record highs, the company is anticipated to go public in 2024. Her plans to push it to new heights are already in motion.

## COMEBACK TRAIL

**HAVING BEGUN 2023** in the most forgettable manner, billionaire industrialist *Gautam Adani* hopes for some respite in 2024. After allegations of fraudulent transactions and stock manipulation rattled investors and wiped off more than \$150 billion from the Adani Group companies' valuation, their stocks have recovered smartly in the past few months. But it's tough to say whether the worst is over yet.

## PENSION & POLLS

**WITH THE GENERAL** Elections upon us, pension remains a buzzword. Will the government roll back NPS and bring back the Old Pension System, or a hybrid model? While a high-powered panel under Finance Secretary T.V. Somanathan was tasked with reviewing the issue, there's no word on it. With more assembly elections, apart from the General Elections, up ahead, the issue will keep cropping up.

## Going Green

**WITH INDIA'S AVIATION** market expected to grow manifold, the country's Aviation Minister **JYOTIRADITYA SCINDIA** has launched a host of initiatives, from building new airports and terminals to introducing DigiYatra. As in charge of two carbon-emitting sectors—aviation and steel—Scindia is also working on tailored de-carbonisation solutions for the steel industry, and making more airports carbon neutral in 2024.

## A UNIFYING EFFORT

**Already being used extensively in India**, efforts are on to take UPI global. But the path is full of challenges, such as navigating intricate international banking regulations, managing risks, addressing tech limitations, enhancing customer awareness, and giving competitive conversion rates, among others. Nevertheless, there are expectations of substantial international collaboration in this space.
