

a better manual method which was less costly and time consuming.

In Paradeep Port, the coal terminal was initially built in 1996. Then, in order to clear the land and drain 3.5 million cubic meters of sand, Paradeep Port contracted Boskalis Dredging, a Dutch business. This is when the PPPL first set up the tools and launched their first business model before tackling the reclamation of the land. Later he signed a contract with IFFCO for heavy machinery and on-site raw material processing when they joined the market.

With all the necessary equipments and expert work force/manpower on site, PPPL has taken up the transportation of fertilizer from Paradip to Dhanmandal for IFFCO. As a result, IFFCO's supply chain has doubled while costs have decreased to an absolute minimum. All of this was made possible by eliminating the three local transport unions who had monopolized the industry and were demanding exorbitant fees while preventing new fleet entries. Mr. Khalid Khan took on the challenge of changing the entire system. By accepting the cargo bulk from the plant and having it bagged by his own fleet, having the same bagged at his own go-down, loading and transporting the cargo with his own fleet to Dhanmandal, where the platform is ready

to load Rakes to various destinations, he could greatly reduce costs of road transport. As a result, the supply chain and production increased from 1 lac to 2 lac per month, providing Plant its profit and farmers their portion of fertilizer. In addition to working with IFFCO in the logistics department, PPPL is associated with IFFCO for over fifteen years. Mr. Khalid Khan's primary skill is taking on issues in a way that guarantees a win-win outcome for all parties involved.

(Good teamwork is the key strength at PPPL.)

Mr. Khalid Khan is a great leader and truly a trail blazer. He leads a great team of trusted employees who are committed towards the business. Mr. Khalid Khan's company has constituted a dedicated internal team, Mr. Prabhat Kumar Nandi

his presence from day one, his cousin Mr. Afaque Khan oversees important company operations, and with assistance of other members of the family, company has created a core group of professionals. With dedicated core staff in place, company is well-positioned to withstand market fluctuations. The company has successfully expanded its operations

we want to extend our efforts to Odisha. **(Approach towards managing risk and ensuring the security of shipments)**

Mr. Khalid Khan is a proponent of calculated risk-taking because it allows the business to escape a challenging circumstance. The most crucial thing to remember is that conducting business requires taking risks. To achieve the intended goals, the company adopts planned strategy, diligence, and commitment to the work.

(The logistics industry's future and the trends that are expected to shape it)

The Logistics plays a crucial role all around the world, and since it is such a large field, nothing will ever cease working in logistics industry. The future of logistics industry is quite promising worldwide, but India is 35 years behind. Although it has come a long way, additional infrastructure and resources are still needed for it to achieve even more. The rationale is that there are a number of challenges and situations that arise in logistics industry that are not present in European countries.

In the industry of logistics, the primary problem is that inexperienced and unskilled individuals compete for projects and eventually lose out, while companies break their promises due to poor risk management and cost estimation. Furthermore, PPPL

is strongly committed to completing its promises, which has helped it gain a solid reputation.

(Initiatives to improve efficiency and reduce waste in logistics operations)

Under Mr. Khalid Khan's direction, PPPL is implementing new technology and tools to increase productivity and cut costs. To stay in business, companies require manpower, intelligence, and the newest technology. The organization is well-prepared for the approaching challenge with its methodical upgrades and trend-following approach. The company has been offering good services for much less money. Due to their connections, network, and performance, it has a high brand value. Additionally, the Bombay Stock Exchange called the company and requested it to list.

50 MOST VALUABLE BRANDS & START-UPS OF ODISHA 2023

to Paradeep, West Bengal, and Andhra Pradesh, as well as to foreign destinations including Malaysia, Indonesia, and Dubai, all with the aid of their core workforce.

(Sustainability and environmental responsibility are the key guiding principle at PPPL.)

The Company only utilizes brand-new or recycled machinery and equipments because outdated machinery emits smoke and causes other environmental problems like increased fuel use. Skilled mechanical staff at the firm takes decisions, decides when to discard on the equipment, and inspects it on a regular basis for issues. With the money we have earned via our job there, we have assisted the forest department in purchasing goods from plantations. We've already completed this in Madhya Pradesh, and
