

Serving Humankind with World-class Medical Intervention

Dr. Prabusankar.P M.S, MRCS, MBA
CEO
Shanmuga hospital
Salem

A leading general surgeon, Dr.P.Prabusankar CEO, Shanmuga Hospital, Salem, Tamil Nadu, is taking forward a legacy established by his father Dr. P.S. Panneer Selvam. The hospital is making advancements in every sphere to become a truly world-class, affordable healthcare hub for the people residing in underserved districts in the neighbourhood of the commercial town of Salem. In conversation with Business Today, he shares how the landmark hospital is transforming the healthcare landscape of the state.

What prompted you to make a career in Salem, unlike many who go for the lure of big cities?

Salem is a picturesque place surrounded by mountains on all sides. I am a second-generation entrepreneur taking care of the hospital started by my father. As you say the returns and benefits are more in big cities, but Salem is my native place. I feel that the healthcare industry though it is now considered as a business, it is actually a service to the society, and we need to carefully blend the right balance of service and business to make it feasible. Salem and its people have supported our hospital right from when we started covering 40 years of our journey, so the benefit should rightfully go to the local people and surrounding districts.

As CEO of Shanmuga Hospital, how are you leading the hospital as a trustworthy healthcare centre, and the centre of excellence that you have?

As the CEO of Shanmuga Hospital and also the second-generation taking care of the medical service industry, it is my duty to expand the business and also make the organisation cope up with current trends while retaining its leading position in the industry. We are adding more infrastructure and conduct regular training for our employees to increase their efficiency in giving better care to the patients and to stay updated. Already an acknowledged centre of excellence in oncology for last 30 years in surrounding 8 districts, the upcoming cardiac, neuro and nephro centres of excellence will add to our strength.

In over a decade since you started practising as a general surgeon, what are the
