

STARTUPS AND SOCIAL IMPACT: ENTREPRENEURS AND STORIES OF CHANGE

Founders of five startups presented their ideas at 'Green Talks', an event that aims to bring together social entrepreneurs on a common platform where they can share their innovative ideas and get an opportunity to turn them to reality.

Green Talks' was held in Ahmedabad by the Adani Group in December 2023 and social entrepreneurs from different parts of the country shared their stories of driving impact and bringing about positive change through their unconventional ideas. It is an open platform that unites the global network of social enterprises which are making broad transformations possible with the aim to accelerate progress towards the Sustainable Development Goals (SDGs).

This year's event was the third edition of 'Green Talks' and among the startups that took part was Dveck Mobility Private Limited. While talking about Dveck Mobility, its founder said they had come up with a device which can be bolted on a bicycle to convert the two-wheeler into an EV (electric vehicle) within minutes.

A team from Haqdarshak, a social impact-focused tech organisation, which is working towards making access to government welfare schemes easy and transparent, was also part of the event. A presentation was shared with the audience to inform it about the concept Haqdarshak works on; its workers explained the concept and the process, and beneficiaries shared how the service helped them.

Among the other startups at the programme was Marut

Drones, which makes smart drones that can be used in several farming applications. The innovation is aimed at helping with the entire crop cycle – from seeding to har-

vesting. ONergy Solar was also a part of the programme. It is working towards making solar energy solutions affordable and accessible. A team from PRESPL, which pro-
