RANK-3	INDIAN INSTITUTE OF MANAGEMENT LUCKNOW
OVERALL SCORE	863.3
PLACEMENT PERFORMANCE	All students placed with a median salary of ₹32.3 lakh per annum
CAMPUS EXPERIENCE	Spread over 200 acres, the campus has a vibrant energy with a large variety of flora and fauna
NEW INITIATIVES	- A blended MBA, an executive PhD, and specialised executive programmes in AI and digital transformation, aimed at working professionals - Two new Centres of Excellence, one focused on well-being and happiness and the other on blockchain technology

sectors such as agriculture, clean tech, education, and healthcare. The institute focuses on identifying ideas that can scale up and solve real problems.

“It is not about chasing valuation,” says Gupta. “It is about creating enterprises that make sense in the Indian context.”

Students also gain exposure

REINVENTING ITSELF

Programmes in analytics, AI, risk management have been added to meet demand

through internships with social enterprises and government-linked innovation programmes, giving them an understanding of both market-based and community-driven entrepreneurship.

CHANGING HIRINGS

Placement data reflects a broader shift in industry demand. Consulting, technology, finance, FMCG, and analytics remain strong, while new roles in general management and product strategy are gaining traction.

The latest placement season saw participation from 25 new recruiters, including Ather Energy, NAFED, GMR Group, Mankind Pharma, PhonePe, HPCL, Javis, and Jefferies. Gupta says placements are just one part of the student journey. “Our focus is on long-term employability,” he says.

IIM Lucknow has been steadily building its global and industry collaborations to widen learning opportunities for students and faculty.

Partnerships include an alliance with Financial Planning Standards Board India for a certification programme in Financial Planning and with IIT Kanpur for a joint course in Healthcare Management.

As IIM Lucknow looks toward the next five years, it plans to strengthen applied research, build deeper partnerships with industry, and expand its international visibility. The goal, Gupta says, is not just growth but relevance. **BT**
