★★	★	NR
NEXT 22.5%	BOTTOM 10%	NOT RATED

► **Return Score:** The monthly risk-free return was subtracted from the fund's monthly return to arrive at the fund's return in excess of the risk-free return for each month. The average of the above computed values was divided by average category return to arrive at Return Score of the fund.

► **Risk Score:** Indicates downside volatility, i.e., the risk of not beating the risk-free return. For all months the fund underperformed the risk-free return, the magnitude of underperformance was added and then divided by the category average to derive its Risk Score.

Portfolio Composition: For equity funds, it shows the portfolio's allocation in large-, mid-, small-cap stocks and cash/others. As per Sebi, the top 100 stocks by market capitalisation are large, the next 150 are mid and the remaining stocks are small-caps.

In the case of hybrid funds, the minimum and maximum allocations to equity and debt over the past 12 months are displayed.

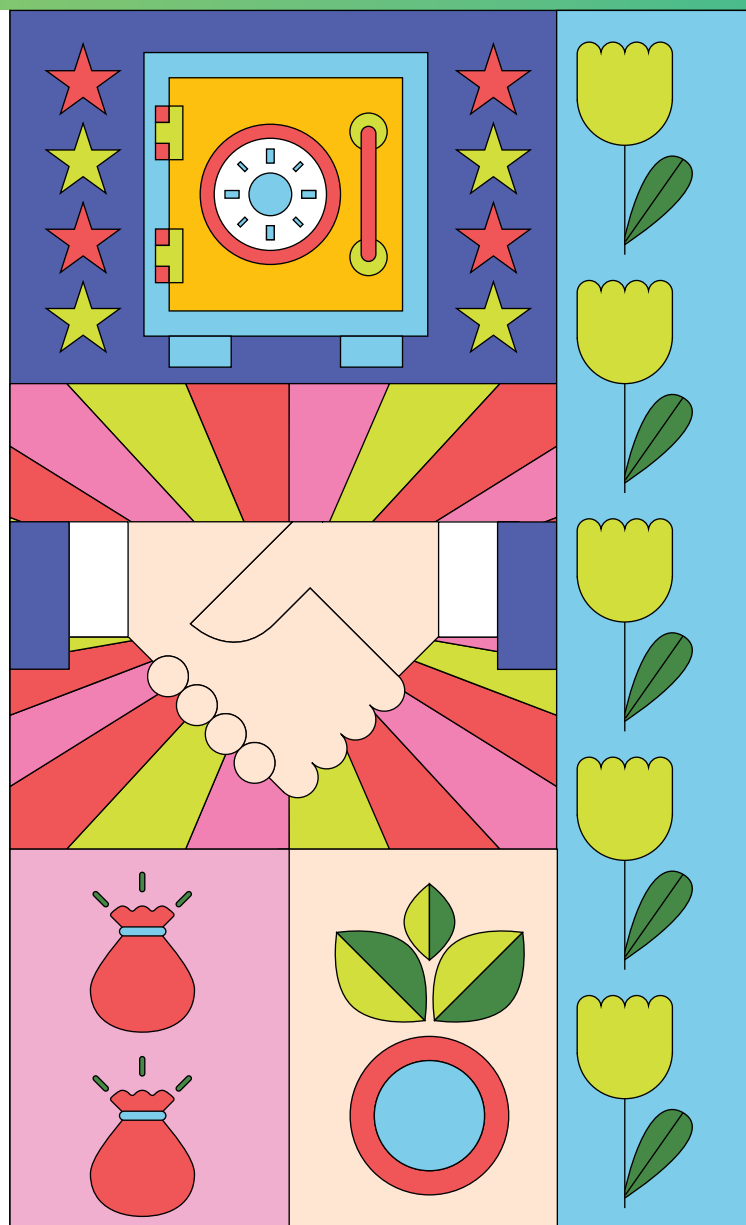

For debt funds, the portfolio quality was divided across three levels. High: Includes exposure to government securities and corporate bonds with the highest grade ratings such as AAA, AAA+, AAA-, A1, A1+, P1+, AA+ and cash.

Medium: Includes exposure to bonds with medium grade ratings such as AA, AA-, A2+ and A2. Low: Includes portfolio exposure to bonds with lowest grade ratings such as A+, A, A-, A3, BBB+, BBB, BBB-, BB+ and below.

Average Maturity: Weighted average maturity of all debt securities held by the fund.

Alpha (for the top 1,000 schemes): Indicates value added (or subtracted) by the fund vis-à-vis the benchmark, for the risk taken. A positive alpha indicates that the fund has performed better than expected, while a negative alpha indicates the fund has underperformed. It was calculated using calendar month returns for the last three years. (See online)

Information Ratio: Indicates excess returns of a fund relative to the category benchmark and the consistency of outperformance. A higher information ratio compared to other schemes with the same benchmark reflects better

risk-adjusted performance. It was calculated using calendar month returns for the past three years. (See online)

DATA DEFINITIONS FOR FUND CARD (APART FROM TERMS COVERED IN SCORECARD)

Market cap breakdown: Division of portfolio's equity allocation across large-, mid-, small-cap stocks.

Portfolio P/E Ratio: Average of the price-to-earning multiple of the underlying stock holdings in proportion to their portfolio weights. A high P/E ratio indicates that the fund has invested predominantly in richly valued
