Gautam Adani.

Chairman Gautam Adani called this era “India’s second freedom struggle” — not against rulers, but against dependency in technology, sustainability and opportunity. “This is a struggle to ensure every community thrives, every innovation serves the nation, and no dream is limited by geography,” he said.

power of empathy in storytelling: “True change begins when we stop seeing sustainability as an agenda and start living it as an emotion.”

Their conversations seamlessly bridged science, art and action — reinforcing Green Talks’ role as a cultural as well as intellectual forum. Each session drew connections between personal conviction and planetary well-being, demonstrating how every profession can be a conduit for climate consciousness.

The Changemakers of Tomorrow

Among the highlights were five young entrepreneurs who are redefining sustainability at the grassroots — from circular fashion and solar innovation to regenerative agriculture and ocean conservation. Their stories captured the spirit of resilience that powers Green Talks: audacity grounded in action. By amplifying such voices, the Adani Group continues to

Planet Before Profit

Adani Group Chairman Gautam Adani defined courage as the invisible force that powers sustainability. “It takes courage to decarbonise at scale, to reimagine business models and to put the planet before profit,” he said. His vision of growth rooted in responsibility has turned the Group into a global benchmark for sustainable enterprise — proving that economic strength and ecological stewardship can thrive together.

broaden the definition of sustainability — from corporate strategy to individual agency. As one of India’s most influential conglomerates, its efforts go beyond renewable energy to encompass biodiversity conservation, community empowerment and climate education.

A Future Built on Courage

In its fourth edition, Green Talks 2025 was more than an event; it was a manifesto for a new kind of leadership — one that blends enterprise with empathy. The conversations echoed Gautam Adani’s belief that progress and purpose are inseparable in the century ahead.

As the spotlight dimmed on the stage, one message resonated: sustainability is not a solitary pursuit but a shared journey. And through Green Talks, the Adani Group has built not just a platform, but a movement — one that gives India’s green dreams a voice, a face, and a future.

Young, Vibrant Voices of Courage, Vision and Change

Green Talks 2025 transformed the Adani Corporate House (ACH) auditorium in Ahmedabad on September 25 into a celebration of courage, creativity and patriotic entrepreneurship.

The event brought together innovators shaping India’s future with ideas rooted in national purpose.

The spotlight shone on five young entrepreneurs redefining impact through innovation:

AKSHITA SACHDEVA: Co-founder of Trestle Labs, whose assistive device Kibo converts printed text into audio, empowering the visually impaired to learn and dream freely.

ABHISHEK CHAZED: Founder of Recyclex, who turns plastic and industrial waste into eco-bricks — cutting carbon and conserving water in construction.

MANOJ SANKER: Founder of NemoCare, whose wireless neonatal monitors save lives by providing timely care in low-resource settings.

SOWMYA BALENDRAN: Co-founder of Sea6 Energy, who is transforming seaweed into carbon-neutral biofuel to drive India’s energy independence.

JENIL GANDHI: Founder of Avinya Leather, who converts crop residue into vegan leather, offering both environmental and social renewal.
