

GIVING WINGS TO INDIA'S AI DREAMS

**THE *BUSINESS TODAY* AI SUMMIT DELIBERATED ON HOW INDIA CAN
LEVERAGE ITS DEMOGRAPHIC SCALE AND DIGITAL INFRASTRUCTURE
TO UNLOCK A \$500-BILLION OPPORTUNITY**

BY TEAM BT

ARTIFICIAL INTELLIGENCE (AI) IS fast becoming an engine of global growth, and India is gearing up to take the driver's seat. The *Business Today AI Summit* brought together the country's most influential policymakers, business leaders, and researchers to define India's AI roadmap for the decade ahead.

As AI reshapes economies, governance, and everyday life, the summit focused on how India could leverage its demographic scale and digital infrastructure to unlock a \$500-billion opportunity. The event highlighted India's ambition to not just adopt AI, but to lead the global AI revolution, empowering 1.4 billion citizens through inclusive and innovation-driven transformation.

A flagship initiative of the India Today Group, the event was a platform for visionaries to explore how technology can accelerate GDP growth, enhance public services, and redefine competitiveness.

With the government earmarking ₹10,300 crore under the IndiaAI Mission, the momentum around AI has never been stronger.

The summit charted the next phase of India's AI journey, where innovation meets opportunity, and technology becomes the backbone of national progress.
