

the country, whether from the corporate ecosystem or even from the university ecosystem," he said

» Virk said it is very important that builders, enterprises, and engineers within these enterprises are empowered to build applications that are robust and can deliver a very strong experience. "The most impressive aspect for me personally has been seeing how people interact with the APIs that we put out," he said

BT EVENT • AI ROUND TABLE

AI-DRIVEN FACTORY

(From left) **Bakaya: S Sathish**, Partner & National Leader - Industrial Manufacturing, KPMG India; **Deepak NG**, MD India, Dassault Systèmes; **Saju SR**, Senior VP, Smart Power Division, ABB India

» Sathish said that artificial intelligence is not going to take away jobs but is, in fact, going to change the nature of their jobs to make them more efficient. He added that the leadership needs good communication with employees to allay their fears

» Deepak said that organisations are

seriously considering how they want to implement AI and have ideas on how they want to take advantage of it.

» Saju SR said that the adoption of AI is based on the concept of the iceberg of ignorance, i.e., 92% of the information doesn't reach the top management
