

▶ In a call after the results for the first quarter of FY26, Wipro's Srinii Pallia said returning to profitable growth was a top priority and guided for a sequential growth rate of -1% to 1%

▶ The combined revenue of the big four IT firms grew at an annual rate of 10% over the last decade, from ₹2.32 lakh crore in FY15 to ₹6.24 lakh crore in FY25

▶ Revenue growth has slowed to 5% and profit growth to 7% since FY23

▶ The IT industry—which led India's boom post the 1991 reforms—is grappling with issues ranging from dependence on a legacy business model to widespread adoption of artificial intelligence

▶ Both Gen AI and Agentic AI (the latter having the ability to solve complex problems) are new and rapidly evolving. Even customers need help to understand the technology, identify use cases, and prepare themselves

▶ Indian IT companies will have to decide if they want to make large investments in artificial intelligence

REBOOT MODE

AS AI UPENDS THE
GLOBAL TECH
ORDER, INDIAN IT GIANTS
FACE A STARK
CHOICE: ADAPT FAST
OR FADE AWAY.
