

FIGHT FOR NUMBERS

- The second airport in Mumbai Metropolitan Region will handle 90 million passengers
- The Noida International Airport plans to have a record six runways over the long term

GULF CARRIERS HAVE BEEN PUSHING FOR EXPANDED BILATERAL FLYING RIGHTS WITH INDIA TO MEET RISING PASSENGER DEMAND

nered with enterprise artificial intelligence (AI) major AIONOS to deploy a multi-lingual, omni-channel agentic AI solution. "At AAHL, we are redefining the airport experience through intelligent, digital-first innovations that turn travel anxiety into excitement. Our partnership with AIONOS is a pivotal step in delivering seamless, personalised journeys. Combined with in-house solutions like Avioo, Adani OneApp, and Airport

in a Box, we are creating a connected ecosystem that drives efficiency, inclusivity, and sets new benchmarks for smart, sustainable, future-ready airports in India," says AAHL CEO Arun Bansal.

The company's integrated digital platform Avioo provides real-time updates, paperless processes, and personalised digital services. The app can be used for a tech-enabled food and beverage and retail experience,
