

Forged in Steel, Built on Trust

How the Jain Family Turned a Modest Kitchenware Venture into a Global Stainless Steel Empire

In 1975, in the crowded by lanes of Mumbai, where sparks flew from welding torches and the aroma of home-cooked meals filled the air, a quiet revolution began. It didn't roar with ambition. It spoke in the language of craftsmanship, reliability, and family values. That revolution was Shree Vallabh Metals, founded by Mr. Shantilal Jain, a visionary who believed that quality stainless steel utensils could bring durability, beauty, and pride into the Indian home.

We weren't just making utensils. We were building trust, piece by piece.

— Mr. Shantilal Jain, Founder

FROM DOMESTIC STAPLE TO GLOBAL PLAYER

Under the brand Neelkanth, the company earned a devoted following in Indian kitchens. By 1990, joined by his brother Mr. Bharat Jain, the founders pivoted toward international growth. The first exports to GCC countries marked the beginning of a global chapter — one rooted in Indian values but scaled for the world.

What began as a family-run manufacturing unit evolved into a

Mr. Bhavik B. Jain

respected exporter of stainless steel kitchenware — admired for its precision, consistency, and commitment to quality.

THE RISE OF THE SECOND GENERATION

Sons Bhavesh, Dhaval, and Bhavik Jain brought with them a modern lens. Tech-savvy, globally connected, and deeply rooted in family tradition, they transformed Shree Vallabh Metals from an established exporter into an internationally recognized kitchenware brand.

Investments in automation, cuttingedge design, and customer-centric practices helped the company scale its reach to over 80+ countries — from the Middle East to Africa, Europe to Southeast Asia.

"The foundation was trust. Our job was to build a future on top of it — with speed, design, and data." — Mr. Bhavesh Jain, The result was not just growth, but longevity. While many legacy brands falter during generational shifts, Shree Vallabh Metals flourished — led by a new vision, but grounded in the same values.

MAXFRESH: A BRAND BORN FOR THE MODERN KITCHEN

In 2010, the Jain brothers launched Maxfresh under a new entity, M/S Bhavya International — a premium kitchenware brand tailored to evolving Indian consumers who wanted affordable luxury.

The formula? High-grade stainless steel. Thoughtful design. Unwavering durability. Today, Maxfresh produces over 300,000 items per month, serves millions of homes across India, and supports more than 2,000 families through direct and indirect employment. "Maxfresh isn't just a brand — it's a reflection of our family's values in every

home it touches." — Mr. Bhavesh Jain, Director Maxfresh world India Pvt Ltd.

BUILT TO LAST

As Shree Vallabh Metals approaches its 50-year milestone, it stands as a shining example of Indian entrepreneurship done right — quietly consistent, generationally ambitious, and globally impactful. Its story is not one of overnight success or market hype. It is one of grit, grace, and generational excellence —forged in steel, bound by legacy.
