

SEEDING INDIA'S FUTURE

(Clockwise from top left) **Rajesh Shukla**, MD & CEO, People Research on India's Consumer Economy; **Amarjeet Sinha**, Senior Fellow, CSEP; **Jayen Mehta**, MD, Amul; **S. Sivakumar**, Group Head—Agri & IT Businesses, ITC

- Speaking about the role of agriculture, Shukla said the government should consider taxing agricultural income
- On Trump's tariffs, Mehta said Amul would not face any impact and backed PM Modi for his strong support of Indian farmers
- Sivakumar stressed the importance of Indian agri businesses becoming export-driven
- Sinha said that the power of collectives, and professionals would be needed to truly harness India's agri economy

INCLUSIVE GROWTH

(From top) **Surjit Bhalla**, Economist & Former ED, IMF; **Dhiraj Nayyar**, Chief Economist, Vedanta; **Abheek Barua**, Economist

- Nayyar underscored the pivotal role of economic growth in reducing inequality. "The only real path to greater equality is through sustained growth," he stated
- "India's consumption inequality remains among the lowest globally. That's a major achievement," Bhalla said
- Barua argued that sluggish private investment is a major bottleneck for India

TOWARDS A HEALTHY FUTURE

(From left) **Shobana Kamineni**, Executive Chairperson, Apollo Health Co; **Dr Ashutosh Raghuvanshi**, MD & CEO, Fortis Healthcare

- "The government should formalise the GST on healthcare," Kamineni said, adding that rationalising
- GST could lead to significant savings
- Dr Raghuvanshi emphasised the need for mandatory health insurance, akin to compulsory vehicle insurance
- Kamineni also stressed the importance of expanding health insurance coverage to a wider population
